EMPOWERING YOUR DIABETES JOURNEY WITH

JENDC

YOUR PARTNER IN HEALTH AND WELLNESS

DIABETES

Diabetes is a chronic condition marked by high blood glucose levels. It occurs when the body either doesn't produce enough insulin or can't use it effectively.

01 Type 1 Diabetes

An autoimmune disease that destroys insulin-producing cells in the pancreas, requiring daily insulin injections.

02 Type 2 Diabetes

A condition where the body is resistant to insulin or doesn't produce enough, often linked to lifestyle factors and managed with lifestyle changes, medications, and sometimes insulin.

"THE BEST WAY TO PREDICT YOUR FUTURE IS TO CREATE IT."

KEY INGREDIENTS

Polypeptide-k™ (PPk™) (Bittergourd Seed Extract)

*Consists of 18 amino acids

Malaysia

- ✓ A single molecule protein extract derived from bitter melon seeds, *Momordica charantia*.
- ✓ It has been clinically proven to regulate blood sugar levels and increase metabolism, due to the homology (33.4%) between human insulin and PPk.
- ✓ Patented in 150 countries, including Australia, Indonesia, Europe and the U.S.

SelectSIEVE® Apple (Apple Extract)

Italy

SelectSIEVE® Apple confirms its activity as modulator of blood glycaemia reducing the fasting plasma glucose by 10.3% in comparison to basal value and placebo. This modulation has taken the volunteers back to a normal glycaemia range.

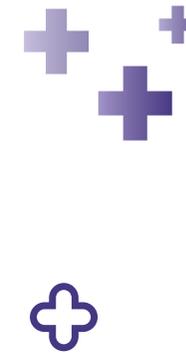

- ✓ Phytochemical complex composed of balanced and highly standardized polyphenols.
- ✓ Contains bioactive components, chlorogenic acid and phloridzin.

Benefits:

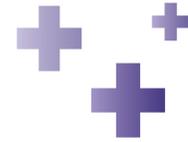

Glycaemia modulation

Cardiovascular parameters

Liver health
